

Introducing FoxTrot Professional Search

advanced, networked find-by-content for Mac OS X focused on legal, media and mobile needs
now available from foxtrot.ch

Geneva, Switzerland - June 18th, 2008 - CTM Development introduces [FoxTrot Professional Search](#), a powerful new find-by-content product for Mac OS X 10.5.x and 10.4.x.

The third commercial application based on CTM's FoxTrot search engine (after [CTM PowerMail](#) 5.6.5 and CTM FoxTrot Personal 2.0), [FoxTrot Professional Search](#) offers precision tools for finding the proverbial "needle in a haystack" within PDF, HTML, word processing, e-mail and rich media metadata, including:

- various categorizations of search results, relevance-ranked
- document preview and full view, with secondary document-level search
- multiple indexed collections and timed updates without the application launched
- client-side access to FoxTrot Professional servers
- worldwide Unicode language support

FoxTrot Professional is relevant to anyone with documents saved for future reference; in field testing, the product has been especially well received in legal (law firm and courts), media (newsrooms researchers, ad agencies and editors) and mobile contexts (MacBook users with document collections).

A 30-day evaluation version is available now in final form from www.foxtrot.ch/download

PRICING

FoxTrot Professional Search is priced at 99 Euro for a single-user version, 199 Euro for a 5-user version with client-server networking. Licenses are immediately delivered within the application itself via a secure transaction to the [Kagi store](#).

UPGRADES

FoxTrot Personal Search 1.5 owners have been offered a special FoxTrot Professional Search for 50 Euro until June 30th, 2008 (70 Euro thereafter).

ABOUT - CONTACT

CTM Development SA has been developing collaborative software and search tools for Mac since 1988. For more information, please contact [ctm-info\(at\)foxtrot.ch](mailto:ctm-info(at)foxtrot.ch) or fax +1 (415) 840 0276
